I sent this to a friend as a get well gift and she was delighted!

“The Magical Garden” is a smaller format book (8.5 x 8.5 inches.) The designs are extremely detailed with many small and intricate spots to color. The designs are inspired by plants and animals in a garden setting. The animals are drawn realistically though some are wearing clothes and are involved in more human type activities. The designs range from cute to pretty and elegant and are a good challenge to color. While I enjoy coloring in detail, this is not a book I would

suggest for anyone who has vision or fine motor issues. It is a book for individuals who like a bit of a challenge in their projects and who enjoy charming idyllic settings. This is what I experienced while coloring in this book and testing my coloring medium on the paper. 54 Garden setting Inspired Designs by a variety of illustrators (not including title and intro pages) in a smaller format book. Designs are printed on one side of thin, slightly rough non-perforated paper typical of CreateSpace. While the paper is actually white, the background of the designs are printed in black. Glue Binding Easy to open to flat position for coloring. Designs do not merge into the binding and have a double framing line at the outer edge of the design. This makes for a natural stopping place for coloring and adds to a more finished looking project. Alcohol and water-based markers bleed through the page to some degree. Water-based bleed through in spots while alcohol-based bleed through freely. Gel pens and India ink pens leave shadows of color on the back of page. India ink can bleed through if you use multiple layers or apply heavily. Colored pencils work well with this paper. Both oil and wax based provide good color when I use multiple layers of the same color. I am easily able to blend (using a pencil style blender stick) and layer multiple colors as well. Hard lead pencils leave dents through the back of the page. Because of the bleed through and dents, I suggest (and use) a blotter page below my working page no matter what medium I use. I prefer card stock but several sheets of heavyweight paper work as well.

Very rarely do I want to color every page in a coloring book, but this one is one of the exceptions. Every page is unique. Goes from nature scenes, animals, people, and scenes. None have tiny details that are hard for some colorists. Of course it has the cheap paper of 's "Createspace" but if you put a heavier piece of paper underneath, you should be ok.

Over half -2/3 rd's of this coloring book pages has pages misaligned where they cut the 2-3 inches off the bottom of the pictures (Huge blank spot) where the picture should of been aligned and put them in upside down and some doubles. Someone did not check to make sure the book was sell-able before selling online. I use to work in a printing company, and we had to check the first, middle, and end books we would run "printed" out just in case something like this happened. Buyer beware! 2/3 rd's of this book is Unusable. I love the drawings that are complete.

The Magical Garden is a great adult coloring book. The pictures are unique. The paper is not cardstock but is good paper. I used markers on my pictures, so I torn the pictures out of the book. The pictures were easy to tear out. I look forward to buying more from this artist.

I was surprised by some of the pics in this book there are some cute pics to color but the abnormal pics take away from the book.. the paper is thin.. I am hoping to be able to return I am waiting on a return sticker so I can give back... Put some of the stranger pics up so U can see what I mean.. but there are some cute pics but the paper is to thin

Really like the designs and I'd give the book 4 stars for that. But the paper is SO thin!! You really can only use pencils in this.

Adorable designs to color on fantastic one sided paper. Not card stock, but better than the norm. This is a very cute adult coloring book, to be honest it's a little bit more simple than others I've bought but very enjoyable to color. Works great with all mediums as long as you use a blotter page underneath.
