Grade Level: Preschool and up

Customer Reviews

Roger Priddy's passion for educating children through fun, informative and engaging books has led him to create some of publishing's most enduring and successful non-fiction early learning books. Roger lives in London and has three children, who have been the inspiration behind many of his best publishing ideas.

As a former nursery school director and child care provider and mother of two grown sons, I have witness first hand the benefits of early learning. You can teach children from birth and these simple color books are an easy way to teach the names of colors and objects. I bought this book for my niece and she loves it, my brother says. The photos are charming. It is a good gift to give a new parent and child to help learn their colors. Children can learn their colors by age two. The Freakanomics researches indicated research shows that intelligence is related to how many books

are in the house. Love to give books as a present for young children.

This was a book for my 2 year old toddler. He's starting to learn about different colors. I like it that it speaks "clearly" about each color. You can understand what its saying, unlike some other children's book that seems like saying everything in the same tone, saying the same thing. The book is hardcover and every page is hard paper. So your toddler cannot destroy this book, you are able to pass it on to your next kid.

I am overall happy with it. It's not my daughters favorite but it is still aiding in teaching her colors. I agree with the others about the voice. I wish it was slower and more clear.

This is for my great grandson to help him talk better. He loves playing with it. He pushes a button, and says the color then my great grandson repeats what the book said.

Don't waste your money. I should have read the reviews more carefully prior to purchasing this. Like many others, the sound is not working. I'll try replacing the batteries (I'm not feeling confident it is the batteries though) before returning the item. If it is the batteries, that's just poor customer service to sell a product with completely dead batteries in it.

My son is deaf and has a cochlear implant, so we got him this book to help him start associating spoken words with signs he already knows. He loves it! He likes matching the correct button to the page and likes signing all the colors he sees, while he's learning their English word equivalents. I'd imagine this book is fun for all kids though! The words are pretty clear to hear too, not robotic or mumbled like a lot of kids electronic toys can be. Great book-- we have others in this series now as well.

i am a teacher for early child hood and elementary education and it is a great buy for teaching basic colors, the kid can hear it and see it.

Purchased this book for my 12 month old granddaughter. I only had to show her twice how to use the buttons. Even though she is so young she does know how to push buttons on her interactive toys that she has had since she was old enough to be propped up in the corner of my sofa. I sat her on my lap with this book and because she is so little I simply showed her to use her thumb to press

the button; she did and loves to sit with me and play (learn her colors).
