This was the only topo map of northern Baja with sufficient level of detail for our use in doing research. The map has village locations but also identified features such as canyons, hills, peaks, and valleys.

nice map I go to Baja a lot water proof.

This map is USELESS to me as the very top right corner of the map (near where los algodones is located) has a huge banner that says BAJA NORTH and it covers up all the highways and roads and towns in that area. If this is where you are headed or if you plan on crossing the border here the map will do you no good. IF you have no plans to travel in that area I guess it's a good map.

Have the Baja South guide, and purchased the Baja North for a diving trip to Bahia de los Angeles. These maps are really good.

Maps are good but should not have the Name stamp over Algodones and area blocking out the roads to connect to the Baja

Great map on its own! Combined with a California Automobile Association AAA Baja map, you will really have it covered.

Good map! I wish there was a close up of Tecate because that's where we crossed the border and there weren't a lot of signs to the freeway right there. However, it's a good map.

Very helpful generally. Many new roads are not on this map.
