Synopsis

Part Two Over two-hundred years ago, scientists began splicing the DNA of humans, animals, and insects. The NWO must act to save the species, a breeder must come in to start it all. No one said that would make life easy for Velma and her new-found partners. Reproduction couldn't be farther from any of their minds, when they're sent to repopulate Earth 2. *Reverse Harem*

Customer Reviews

Part two had less action but more relationship building and setting up anticipation for the next release because we will be seeing them being sent to a new dangerous world for them to conquer. I can only imagine what they will have to deal with. This serial is the first I've read from this author but in less than 50 pages she engaged me fully and got an emotional response out of me in both part one and two. As a mother the ending made me want to cry right along with Velma and I was cheering her along when she fought Tibby. I feel awful for Tibby not getting a choice but suck it up

buttercup! There is never an excuse for neglecting a baby no matter what, I could care less that it is A.I. or not. That is just wrong so yes I'd have liked to tackle her right along with Velma. Greatly anticipating part three, so hurry up writing! ;)

I'm really enjoying this. It's very different. Basically you have humans spliced with animals to create new species. But they are raised in a lab. They have to survive a bunch of challenges and obstacles. Now a certain few have been chosen for a reproduction program and taken to a new planet to repopulate.

I am loving this serial. It is so different from other books but still has all the requests for a great story: interesting characters and relationships that grow and evolve and a plot and world that is intriguing and suspenseful.

I'm really enjoying the heck out of this serial it is different and even if Velma is a little too shy for my taste she speaks up when it matters. Love the turns this is taking I hope there are more than 4 additions for this story!

I loved part two. I didn't think I would because let's face it, the original is always best. But I'm in love with the guys, I'm excited to see their dynamic on the new planet. And she has friends! Cmon part three.
