Customer Reviews

Michael L. Grey, MS, RT(R)(MR)(CT) is Assistant Professor of Radiologic Sciences at Southern Illinois University (Carbondale, IL). He actively teaches review courses for rad techs certifying in MR and CT. Jagan M. Ailinani, MD is a radiologist and formerly Clinical Professor of Radiology and Community medicine at Southern Illinois University (Carbondale, IL).

For its size, this is a fine book on pathology. The portability and completeness of this book make it top notch and a required element in any imaging suite's library. Students will love it as an option for hauling large text books to their clinical sites. It is filled with accurate images, both MRI & CT, giving users different perspectives on the same pathology. Great book and a definite must have.

This is a great book, I had a patient today and her brain had obvious pathology. This was the first day that I took the book to work. I opened up the book, look for brain pathology andthere was a brain that resemble the brain that I was scanning, pathology and all.

Have had this book for about 6 weeks. Great hand book to quickly look up most common pathology. Would recomend it to a MRI student and/or experienced tech.Shipping fast, goid quality book and packaging.

Great book to have if you're an MRI technologist. It will help give knowledge that you're more than likely going to need. I always keep it by my side while I'm scanning.

great product

Love this book. Well described pathologies with pictures. Use it all the time.

Very good reference/study guide for the price.

This was very helpful for class the best you can get for pocket size atlas don't look any further for your needs.
