## Customer Reviews

Since Eyewitness Guides doesn't do Ecuador and the Galapagos, I was forced to fall back on Lonely Planet. Some useful information, but a lot of garbage neither desired or practical. OK, but not great.

Of the travel books that I have read for Ecuador this is the one I keep coming back to. Lonely Planet has cultural insights that I personally appreciate. The references to things like lodging and restaurants were up to date. The descriptions were not so much recommendations as descriptions of choices that you can make decisions from.

no nuts and bolts. not even a real recommendation. what I expected was an overview of things to do and see.

Book has been worth EVERY penny, have gotten many ideas for our trip from it. Taking it with us with tabs marking things we want to be sure not to miss. Do not buy this book the day before your trip, take your time to go through it (we bought it a month ahead of time)

descriptive, but I'm more a visual person

Great guidebook at an affordable price. We appreciate all the travel tips and hints about the must-see things for short visits.

Perfect book for my trip - food is not superb as indicated - bland but wholesome

I was in the Galapagos for 9 days, and Guayaquil for a day. This book was perfect for this purpose, accurate/up-to-date. Guayaquil is a bit of a confusing place, so I think there could be ways to help the user, but overall, I was happy with it. I saw other travelers with it as well, who had longer trips,

and they also were happy with it.
