# Anthroposophy And Science: An Introduction

## Synopsis

This book is the first thorough introduction into the scientific basis of anthroposophy and anthroposophical medicine in the context of academic science. On a sound epistemological basis and in the context of current debates it analyses basic concepts of physics, chemistry, genetics, morphogenesis, biology, neurobiology, psychology, and philosophy of mind, with an emphasis on the problems of life, mind-body interactions, and free will. The result is a non-reductionistic anthropology acknowledging the emergent properties of body, life, soul, and spirit as equally real entities. This concurs with the basic concepts of anthroposophy and anthroposophical medicine, the justification of which is discussed in relation to the history and methodology of science as well as evidence based medicine.

## Book Information

Hardcover: 368 pages

Publisher: Peter Lang GmbH, Internationaler Verlag der Wissenschaften; New edition edition (June 13, 2016)

Language: English

ISBN-10: 3631672241

ISBN-13: 978-3631672242

Product Dimensions: 6.1 x 1.1 x 9 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

## Customer Reviews

«Das Werk besticht in seiner stringenten Gedankenführung, in seinen gut erarbeiteten Argumentation, in seiner strengen und differenzierten Begrifflichkeit sowie in seinen Anknüpfungen an moderne Forschungen aus den Naturwissenschaften.» (Renatus Ziegler, dieDrei Zeitschrift für Anthroposophie in Wissenschaft, Kunst und sozialem Leben, Mai 2017)

«In summary, this book offers both an excellent review of the historical development of the scientific method in biology and medicine and a constructive critique of the same. [...] It will serve as a valuable resource to all who are interested in epistemological and ethical questions in medicine

and its organic development into the future.Â»>BR> (Branko Furst, Chanticleer Volume 27, Issue 6, 2017)

Peter Heusser is a medical doctor with a comprehensive experience in practicing, teaching and research in anthroposophical medicine, first at the University of Bern and in Swiss national research projects. He is now Professor for the Theory of Medicine, Integrative and Anthroposophical Medicine, and Head of the Institute for Integrative Medicine at Witten/Herdecke University, Germany.
