Astrophotography: The Most Spectacular Astronomical Images Of The Universe

Synopsis

Get swept up in the beauty of our universe with this collection of spectacular images taken by today's most powerful telescopes and orbiting probes. These breathtaking photographs both enthrall and inform as they capture the many wonders of outer space. Moving from the planets in our own solar system, to the Milky Way, to the far ends of the universe, it features images taken by Earth's largest telescopes—including the Hubble, Herschel, and Keck telescopes in Hawaii—along with those sent back by spacecraft such as Cassini and New Horizons. Gaze at merging galaxies, overlapping galaxies, and galaxies undergoing huge bursts of star formation, as well as the most distant objects we are able to glimpse. The images, which come from agencies such as NASA and the European Southern Observatory in Chile, all include commentary by an expert astronomer who explains what we are looking at and provides technical information on how the photo was achieved.

Book Information

Hardcover: 192 pages

Publisher: Andre Deutsch (August 1, 2017)

Language: English

ISBN-10: 0233005013

ISBN-13: 978-0233005010

Product Dimensions: 9.7 x 0.7 x 11.1 inches

Shipping Weight: 2.3 pounds (View shipping rates and policies)
