I've absolutely LOVED Carella's Warp Marine Corps series, and this was a pretty awesome conclusion to the series. We get plenty of battles where the Marines and Navy kick tail against a number of foes, new and old. One of the strong points of this series has been the introduction of new

tactics by different factions, followed by adaption to those tactics by the other side. There's plenty of that here, along with the reinvention of old tactics with a new twist, and other fun surprises. Another huge draw to this series has been the intricate world-building of a realistic universe where every species feels different and original. Carella nails that here as well. That being said, I do have some minor gripes. The Warp Marines take a big back seat to the Navy in this book, and Capt. Fromm is relegated to a secondary character, while the pilots and Navy fleet admiral take center stage. Even worse, our lovely CIA agent Heather barely appears, and our alien viewpoint from Grace Under Pressure and the Puppies is totally left out. Mostly, I'm a little upset about the series being over already. I feel like there are so many other stories to be told in this universe, especially with all of distinct alien races who have made minor appearances in the series. I want to know more about how the Puppies and Worms react to the events of this book, and the Ovals and all the rest. As the series has progressed, the story has become less and less about the war with other aliens and more and more about what lies in the Warp, but still... those aliens were cool. And so many of them were just barely glimpsed. It would be a shame to just leave those possible plot threads dangling. There's more than enough for a spin-off series here. But regardless of my minor complaints, the book was great, and the series is fantastic. I'd recommend it to any sci-fi fan.

Good to read a novel which doesn't end in nihilistic dystopian nonsense. A really great read. Carella manages to bring terrifying bogeymen to life without losing sight of entertaining the reader or trying to push a political/environmental/social agenda so often marring today's science fiction and fantasy. Great job.

The war is now over but at what cost!! Humanity is safe but for how long!! Will the aliens decide that sometime in the future that they way to fight humanity again. We will have to wait and see.

Cracking space opera. This series plays with some unique and interesting concepts. It's a credit to Mr Carell. Give it a try, you won't be disappointed.

A well written, fast paced, first class series of military SciFi. Read the entire series. Hope to see more from this author.

A great end to an entertaining series. A definite but and read!

A fun narrative of an interstellar and interdimensional war. Humanity is introduced to the star faring community the hard way. When they prove unusually adept at navigating hyperspace and the beasts that dwell within it, humanity must be destroyed.

Loved it. Can't wait for the next one.
