This book is a gold mine of examples! On page 184 the author says... "Advertising is not supposed to be entertainment! You may be entertained by it, but that's not its purpose. It's not a creativity contest. It's not meant to grace the walls of the Louvre in Paris. It's also not poetry, comedy, or a riddle to be figured out. Advertising is not about winning awards for being tricky, off-the-wall, or ingenious. Advertising - plain and simple - is about selling products and services. It's business communication with the goal to increase sales by interesting people enough in a product or service that they ultimately trade their money for it." Booyah! Mind blown! Here's the deal. The author makes

complete sense with all the agency examples and he reveals the truth behind the true intention of advertising. It's about selling but in an ethical way. The book covers a lot of ad agency examples and case studies that you can incorporate into your own campaigns BUT with your target market in mind. Pick and choose elements from the campaigns to include in your very own marketing materials. You may or may not agree with all of his methods but the book is a worthy read.

Drew's insights unlock secrets behind increasing sales by selling much - Much - MUCH more effectively than I've ever done before. I confess, I was a skeptic at the beginning of the book. After all my MBA and 28 years in "professional marketing" had me doubting the value of the content. However, after reading the book it was I who doubted my beliefs about everything I had ever learned on effective promotion. Page after page I found myself nodding in agreement. My ego could not deny that there was real truth here. The result? I've just rewritten chunks of my website. Bottom line? It's one of the best investments I've made for my business to date. You want to write powerful copy that draws customers like bees to honey, right? If so, then purchase *Cashvertising* this very minute, pay for the express shipping and begin writing copy that sells more tomorrow. One last thing. . . at book's end Drew invites readers to email him any question he/she has as a result of reading

the book. He responded quickly to mine and gave me the answer I needed. Now that's what I call full service.

Hats off to Drew!! I've read a ton of books on marketing - both digital and hard copy. This one is an exceptional resource that took exhaustive levels of experience and research to author. This is one of the best marketing books I've read & I think I need to re-read it several times (although I will probably need to buy a new copy since I've underlined so much in the first copy I've bought). It's truly a 'gem' in my treasure collection of books. There are so many topics that Drew condenses into simple, concise, fluff free, & to the point nuggets of wisdom on a ton of topics relevant to marketers & advertisers. Drew simply blew me away with his level of experience. I bought the book based on the reviews I read here, and now that I've read it myself I wanted to expand this book's popularity since it over-delivered. Happy advertising! Randall

This book is so easy to read and has become my BIBLE! It is perfectly organized, starting with the biggest aspects of understanding consumer psychology and then breaking these ideas down into specific techniques advertisers can use, especially for copywriters. When I'm working on campaign ideas I constantly have this book sitting next to me so that I can use it for reference. Not only does this book offer great ideas but it references tons of other writings, philosophers and psychological studies to back the information and facts. For those people who are like me and want to find related readings this is a great feature of this book. PLUS, it gives a recommended reading section in the end of the book. You should not read this book if you don't want to grow your skill set as an advertiser or simply grow your business. But if you do, I highly recommend this book.
