The Toxin Solution: How Hidden Poisons In The Air, Water, Food, And Products We Use Are Destroying Our Health--AND WHAT WE CAN DO TO FIX IT

Synopsis

Eliminate avoidable toxins, mitigate the effects of those you can't avoid, and enjoy a longer life with this essential health guide from a pioneer in integrative medicine, Dr. Joe Pizzorno—the author, teacher, practitioner, and founder of Bastyr University, the country's first and largest fully accredited university of natural medicine. Dr. Joe Pizzorno is convinced that lifelong good health rests on two key determinants: your exposure to toxins and your ability to process them in your body. While lifestyle, diet, and genetics all play a major role in well-being, many symptoms of declining health and chronic disease are rooted in toxic overload—our exposure to a barrage of chemicals, heavy metals, radiation, electromagnetic frequencies, and pollution that are the byproducts of modern life. While the human body has an innate capacity to detoxify, it cannot cope with the elevated levels of toxins we are exposed to today. Most alarmingly, this toxic overload has helped transform once rare diseases into epidemics affecting people of all ages. In *The Toxin Solution*, Dr. Pizzorno provides the proven detox and tailored methods he has developed to heal toxic overload and restore health in just eight weeks. With this essential guide you will learn how to: Avoid toxins in food and the products you use; Mend your gut and prepare for detox; Support your body in releasing the chemicals; Repair some of the damage toxins have caused. Fortunately, our bodies have a tremendous capacity for healing and recovery. With *The Toxin Solution* you will discover how releasing and avoiding toxins can help you to feel better today—and every day for the rest of your life.

Why I wrote *The Toxin Solution*I have been involved in medicine now for almost half a century as a

researcher, student, clinician, teacher, lecturer, author and advocate at the local, state and federal levels. Over this time, I have taught tens of thousands of students and doctors, authored or co-authored 11 books, written over 100 articles in scientific journals and cared for tens of thousands of patients either directly or indirectly through sophisticated corporate wellness programs I designed and helped implement. During this time, I have seen a relentless increase in chronic disease and dramatic change in why people are becoming chronically unwell. For much of the twentieth century, the primary causes of chronic disease were nutritional deficiencies and excesses. We all know about the problems with excessive sugar, nutrient-poor food and unhealthy fat consumption. However, starting about 60 years ago, something fundamental changed. Let's use diabetes as an example of what happened. When I first started in medical research way back in 1970, diabetes was rare. In clinical practice in the late 1970s, every year I would only see just a few patients with either Type I or Type II diabetes. But now it has become one of the most common diseases seen by doctors every day affecting around 15% of the population. Taking care of people with Type II diabetes has become the most expensive of all diseases accounting for a whopping 14% of healthcare expenditures. What happened? Toxins. Almost all the diabetes-inducing toxins are new to nature chemicals created by researchers to provide us many of the benefits and comforts of the modern world. Unfortunately, they had many unexpected side effects. These effects have been ignored or discounted by the industries dependent upon these chemicals. On the book's website (thetoxinsolution.com) and in the book is a figure showing that the diabetes epidemic correlates closely with the growing presence of toxins in the environment, food and even health and beauty aids. Of course, correlation does not prove causation--but sure shows where to look. As you can read in TTS, I show the primary toxins which are causing diabetes. The purpose of The Toxin Solution is to help you understand how toxins are damaging your health, where they come from, how to avoid them and the safest and most effective ways to get them out of your body. Extracted from Chapter 1.

The book itself has some great info that more people definitely need to be aware of, but as someone who has done a fair amount of investigating about environmental toxins and health connections prior to reading this book I can't say I learned a ton. I specifically bought the book to get the BONUSSES advertised on the authors website (you submit your email and order confirmation/receipt # from where you bought the book). After over a month without receiving my bonuses via email and reaching out to them multiple times with no response back, I am regretting my purchase. What a waste for me!! Maybe they will see my review and finally respond to me

inquiries!UPDATE 8-29-17: Still no response from their customer service.

I purchased this book in preparation for a heavy metal detoxing and it has helped a lot it's quite informative I will be removing my amalgam filling's I needed a pre-detox & post detox & this book along with other research I have done will be very invaluable!!!

Written by the co-founder of Bastyr University, this book on detox, tracks the science of toxicity while helping you go through your body in the right sequence to detoxify and restore health while minimizing detox reactions. Highly informative and science-based.

Informative certainly, and I would like to try the plan, but are recipes available for the soups and the moussaka, etc. listed in the meal plans? I couldn't find anything on thetoxinsolution.com site, referred to on p. 210. The meal planning is already a little daunting without having to search out recipes and checking to make sure that they meet the criteria of the detox. I also apologize for putting my question in the review area, but couldn't find a question area for this product.

This is an amazing book, which clearly explains in layperson terms, the dangers of the toxins that are pervasive in our lives, along with a comprehensive, doable way to help detoxify and get many toxins out of your life. It's the first book that clearly shows the evidence of how and why toxins are such a problem.

I suspected packaging, food processing and agricultural methods were introducing toxins to us but it was a subject that was hard to bring together. This book does that. It lays out clearly the sources and health impacts of various toxins being introduced to our food and our environment. It's a must read!

If you are looking for the answers to many of your health issues, this book is a must have. Cleansing is a necessary activity in the chemically laced world in which we now live. The Toxin Solution has made a profound difference in my life and my health.

Dr. Pizzorno is a great teacher (no surprise he founded a university) and it shows in his writing, which is easy to read and understand, and includes simple steps we all can take to reduce our exposure to toxins. Please read and share this with your friends and families.
