## Customer Reviews

"This excellent book offers indeed what the title suggests: insights--deep, comprehensive, and very practical. They are offered with great warmth and wisdom by a person who is both an anthropologist and a missionary. . . . With the addition of some questions for further thought and suggestions for reading, this book will make a good textbook in the field of missionary anthropology."--Gottfried Oosterwal, Religious Studies Review

"In this book Paul Hiebert has pulled together an impressive array of insights (from his own missionary experience and from the experience of other missionaries) which anthropology offers the would-be missionary. . . . The book has been written in an easy-to-read, straightforward style. Hiebert provides an abundance of primary sources for those who might want to pursue further individual insights. It is a book that will be valuable to mission executives, missionary candidates, and even experienced missionaries."--Jacob A. Loewen, Missiology

"This is a book that needed to be written. . . . No single volume focuses the insights derived from the study of anthropology so comprehensively and yet so practically on the life and work of the average evangelical missionary as does this one. While ideal as a supplementary text for a course in missionary anthropology, this book can be read with real profit by anyone engaged in or contemplating a cross-cultural ministry. . . . The book is replete with helpful tables, charts,

diagrams, and carefully selected excerpts from other writers. . . . This is the kind of book that deserves to be read not only at the beginning of one's missionary career but also at five-year intervals thereafter."--Kenneth Mulholland, *Evangelical Missions Quarterly*"[Hiebert] provides a sound treatment both of culture and of the gospel that denies the complexity of neither. He treats the task of living in another culture with much practical wisdom and a good deal of intellectual sophistication. He presents a thoroughly sound and persuasive approach to contextualization and the communication of the gospel. . . . This is all done in clear, nonjargony language. Effective charts and diagrams sprinkle the text and go a long way toward illustrating difficult concepts and ideas. . . . This book is believable, convincing, and practical. . . . It would be useful for courses in applied anthropology, missiology and missionary preparation, and the theory of culture."--Harley Schreck, *Perspectives on Science and Christian Faith*

The late Paul G. Hiebert (1932-2007) was distinguished professor of mission and anthropology at Trinity Evangelical Divinity School and previously taught at Fuller Theological Seminary. He also served as a pastor and missionary to India. He received his Ph.D. from the University of Minnesota and was the author or coauthor of numerous articles and books in the fields of anthropology and missions.

Mr. Hiebert's book was instrumental in getting me back to my Christian roots! He is a genius of our time in the Christian field of knowledge. I was reminded of all the truths that make sense in this world that are completely opposite to the world itself, which opposes Christ! They can be argued, but truth always comes up on top when it is "rightly divided (2 Timothy 2:15)." It is a brilliant read for those who wish to share the truth that we all need to hear--the one truth that will change our lives for the better and make us new creations in Christ! Absolutely invaluable! Thank you, Mr. Hiebert!

deep but understandable material for missionaries or missionaries in training.

This book is a great read. It is not too dense, while still being thoroughly insightful. Gives a good perspective for Christians to understand before they become missionaries

A good book that we used for class as we studied Anthropology! I liked it at most parts and it really helped me to understand this important subject and I realized a lot of things about myself and life as a missionary. Good book as an introduction

The author goes through every stage at a missionary encounters and explains how the gospel can be practically communicated cross-culturally. He gives strategy and wisdom to loving people of different faiths, yet not compromising but fulfilling the biblical mandate to reach the nations for the gospel of Jesus Christ. This is a must read for anyone inspiring to reach their neighbor or a nation for the glory of The Lord.

Clearly covers what a new missionary will experience on the field. This can only come from being through it himself.

"Anthropological Insights for Missionaries" should be required reading for anyone involved in short or long term missions. While well researched, this book also comes from an insider. Mr. Hiebert's years of mission experience shine through in the practical applications. As you read answer questions like, "What are my cultural assumptions?" or "Where does the culture not meet the people's needs?" This would make a great supplemental textbook for any missionology class.

Excellent by one of the top authors in the field. The brief case studies bring the text to life and help equip the reader for applying the insights to ministry.
