Aquaponics In Winter: How To Heat Your Aquaponic Garden In Cold Climate

Synopsis

Aquaponics is a food production system that is increasingly being utilized by people all over the world. This farming technique is a sustainable and environmentally friendly form of agriculture that combines the raising of aquatic animals such as crawfish and snails with conventional hydroponic farming techniques.

Customer Reviews

Timothy Tripp is a published author who specializes on gardening and farming topics. Gardening is the passion of his life and he enjoys all aspects of it. For Timothy gardening is an endless source of inspiration as well as the way of relaxing. He thinks that garden is like a painting and it is up to you how well you paint it. Besides gardening Timothy also has a big interest in farming related topics. Timothy wrote books on various gardening subjects including container gardening, vertical gardening, herb gardening, raised bed gardening, aquaponics and other. In his books he focuses on giving quality and actionable information to the actual readers. Timothy thinks that being a gardener is much more than just planting and maintaining plants it is also a way of living and expressing your attitude to the world. He thinks that gardening is one of the most delightful experiences that exist.

If you know nothing about solar heating, greenhouses or aquaponics buy this book.

This was nothing that I valued as new info I couldn't find easily in the web.
