Gr 5 Up★ "This introduction to the world of blogging, vlogging, and podcasting will take students from idea to execution and completion. Birley first encourages safety on the Internet, promoting parental involvement in the process. He then outlines how to find "your story" (what the content will center on) and offers tips on making a mind map and deciding which social media platform is best, along with information on all the aspects involved before posting (for instance, post length, images, lighting, audio, and more) and the different equipment needed. There is a discussion of etiquette and properly citing or linking work from other sources. Birley also covers handling various problems, from technical issues to audience responses. The emphasis is on helping students find and develop

their own voices while encouraging them to reach out to friends and family to support their burgeoning media pages. Cartoon illustrations depict a variety of teens interacting together and mirroring the text instructions. There are a page of useful links and a glossary of pertinent words. VERDICT A general introduction for collections looking to expand their resources on social media.â "Cynde Suite, Bartow County Library System, Adairsville, GA
