Linda Westwood is a #1 Best Selling author of various books about weight loss, dieting, exercise programs, and everything nutrition. In her books, Linda provides daily action plans and fantastic advice on how to lose weight, burning fat in those hard to lose areas, better eating habits, morning rituals that lead to a healthy body, and so much more.

This book is really amazing. Linda does a wonderful job of giving tons of great tips that make losing weight super simple. It really does all come down to habits. Some of these are quite clever like drinking green tea and swapping foods that you normally eat for ones that are healthier. Eating breakfast is also something I neglect to do, but can see how it really would speed up your metabolism. With 51 tips, you really get your money's worth from this book. The point is that you don't have to have all of the tips in order to make progress. By combining and mixing and matching tips together there is something here for everyone!

This book is very interesting, but it is not really what it says on the cover. There are various habits

presented in it that would certainly help with losing weight, but they are not "quick" and they are not targeted on the "belly fat". Habits by definition can't be quick, it takes time to build habits. But that aside, they make sense and they are helpful, although some of them are too obvious (skip dessert, stay hydrated " fascinating, never heard of it!) Everyone would benefit from implementing these habits into his/her life, but that is not so easy and this book can only help as a guide. Most of the work still depends on the person. But it is a good book and it has value. Recommended.

Cannot express how much this is a fantastic book. There are so many habits and even more than the ones listed. For habits that are a bit more difficult to quit (such as quitting soda for me) the guide provides healthier alternatives. It's really easy to tell that this book wasn't lazily written. Every habit has a good purpose and also has its pros and cons and I already know what habits to switch to first so I have a clear ticket to losing belly fat. Very impressed with the author's creative approach.

There are many things that can make us or break us as an individual and one of them would be our habits. This book lists down several habits that can help us stay healthy and fit. Now, these habits and tips are not secrets, you might have read them somewhere, but of course in time, you will not be able to remember them and going back to refresh your memory will not be that easy especially if you read them from different websites and articles. This book collates all of those and puts them in a handy book that you can refer to anytime. The way the habits are written is very simple so understanding them would be a breeze. I say this book is totally good!

This book contains the right information to lose weight. Dieting doesn't help you lose weight, but changing the way that you eat and the way that you think about food will help you lose weight and keep it off forever. The 20 healthy habits in the book is very effective and not at all boring. Try to implement one or two habits at a time and once you've got those down try a few more. Eventually you will find yourself with a balanced life and a lot less belly fat. I love the morning habits mentioned at the last part of the book. It is really amazing!

I enjoyed this short read. Although I work out regularly, practice many of the stress reduction techniques mentioned, and work at living healthily, I found myself taking notes of many things mentioned that I need a firmer commitment on. Very clear and well written and organized as well. Thank you!

I interpret these "habits" as tips because I never really had what it took to break my habits so for the past several days, I've been picking eating and workout tips each day and I'm noticing some encouraging results. Belly fat trimmed a little bit. I think the trick is to always choose at least one workout and eating habit and if you cannot stick to it, cycle to another. Been working well for me so far. I really like how each habit is thoroughly explained.

The book has simple and effective information that could be the start for a flat belly. All you need to know about diet, exercise, giving up bad habits, foods you should eat, sleep routine, exercises. The information about postures was new for me and seems great. The book lists down the tips, tricks, methods and advice which will make you lose fat in the most natural way without interfering with the body functioning. Excellent information!
