Infection Control In Home Care And Hospice

Synopsis

An official publication of the Association for Professionals in Infection Control and Epidemiology, Inc. (APIC), the highly successful *Infection Control in Home Care and Hospice* helps home care providers assess the infection control needs of their organization, and develop home care infection and surveillance programs. The Second Edition has been thoroughly updated and revised with the latest CDC Guidelines on infection control in home care, including Hand Hygiene, Prevention of IV-related Infections, and the 2004 Isolation Guideline.

Customer Reviews

Just what I was looking for to have data for teaching CNAs and nurses infection control.

Very good update to their first book. Excellent resource for Hospice infection control. I recommend it for anyone working in Hospice and/or Home Health.

Very thorough and up to date.

Excellent resource

This text is remarkably well written, concise yet thorough. It has proven to be invaluable in the development of an infection control plan for home hospice care. Though somewhat pricey, it is more

than worth the cost due to being so well done and truly helpful. The authors demonstrate a broad-based knowledge of issues that face providers of home-based care. This is one of those texts that one repeatedly refers to and that will not likely ever collect dust on a shelf!

Great reference! New standards make it more difficult to know everything needed and this makes it easier to comply.

This text has all of the answers to the frequent infection control related questions that arise in my home health company.

This is the first book written to help Home Care Agencies in designing their infection control programs. The book is well written and very specific for the home care setting.
