Very happy, gr8 condition.

Eat Smart Stay Well is a wonderful reference book that covers the health benefits of power foods intended to improve an individual's health and well being. Part One of the book describes the top 5 food choices for specific health needs. For example, if you have high blood pressure or high cholesterol foods such as cherries, pistachios, rye, buckwheat, and asparagus are proven to reduce both. Cancer, allergies, diabetes, and a variety of other fairly common health problems are covered with power food recommendations. Part Two describes how power foods work, and Part Three is an A to Z description of power foods and their uses from alfalfa to yeast--I guess there is no power food starting with the letter Z! I was surprised and pleased at how well written the book is for a fairly scientific topic, how interesting the author presents the material, and how helpful the information is. The book should be on every person's bookshelf. It's amazingly comprehensive, quite affordable, and I expect my family will refer to it regularly.

Amazing reference guide to smart power foods. Used it already to determine how to use our just planted mustard seeds and mint plants. My Dad always had vegetable, flower and herb gardens and was interested in the health benefits of these plants. I was happy to see many of the plants that I grew up with were in the book. Now I am learning about others that I didn't know about and also how to use the ones that I did know about in different recipes.
