He introduces the hunters and farmers, the past and present, and the physical contexts and the sublime speculations of tribal religions, even the subtle shades of meaning within an Indian community.

Textbook for school but actually quite good. One of those texts that is good to keep if this is your field. If you are humanities or history and want to keep one Native American boom on the shelf for reference this one is great. Broad enough to cover it all yet specific enough that you can do some good work with it and reference it for other things

If you don't know anything about Native American religions and you want a general overview, this is a good place to start. Ake Hultkrantz begins with a chronology of the cultures, explains a little about traditions and worldviews, then goes on to give two examples: a society of hunters (Shoshoni), and a society of horticulturalists (Zuni). It is a very short, simple and effective way to generally categorize these societies, and will help direct you to further reading based on your interest.
