Fun Science: A Guide To Life, The Universe And Why Science Is So Awesome

Synopsis

Welcome, fellow humans (and others), to the the world of FUN SCIENCE! I'm Charlie, also known across the internet as charlieissocoollike. In my book, I'll be taking you on an awesome journey through the cosmos, beginning with the Big Bang through to the Solar System and the origins of life on Earth, all the way down to the particles that make up everything around us (including you and me!). Expect frequent digressions, tons of illustrations of not-so-sciencey things (NB a microwave flying through space), and pages packed with my all time favorite mind-bending science facts. So, get ready for a faster-than-the-speed of-light (OK, not quite) tour of all of the best and most interesting things that science has to offer us... and most importantly: WELCOME TO THE UNIVERSE! (Written by a Science Fan NOT a scientist!)

Customer Reviews

"it's easy to be carried along by the jokes only to realize several pages in that you're learning a ton. A science lover will like this, but a lot of readers will become science lovers after starting here." - BookPage

Seen this at barnes & had to check , much more satisfied and a good read.

Love Charlie's book and his videos so much, left a review on Books-a-million :)

Nice over-view of science, especially for younger kids.

My mistake. Not at all what I expected. Caught a couple episodes of his tv show and thought I was buying a book with simple household experiments. Not that at all. And not bedtime reading to my 8 yr old grandson either. Should have researched better.

A good book for people who want to be educated in science. But in addition to that, it is clear a lot of care was taken into this books making. The illustrations are funny and cute, the font and letter size are easy to read, especially for someone who has difficulties reading. I think this book would be appropriate for anyone from a middle schooler to an adult who simply wants to know more about the universe we live in.

Charlie wrote a good book, I highly recommend it-Dan (Kevin's boyfriend)
