Customer Reviews

US Student: "Great format and chapter outline. The descriptions are very concise and have great information. The tables with the side effect comparisons of drugs in the same category are wonderful. The pictures that describe the mechanisms of action help illustrate and assist you in remembering the material." "This pharmacology textbook is one of the best for teaching a basic pharmacology course. This third edition is markedly improved over the earlier ones. Although

designed especially for osteopathic and allopathic medical students, this book also would serve as an excellent text for pharmacy, nursing, and other allied health professions students who are required to take a basic pharmacology course. This book will function as a useful text for both discipline-based and integration-based curricula. Weighted Numerical Score: 98 - 5 Stars!" - Thomas L. Pazdernik, PhD(University of Kansas Medical Center), from Doodyâ™s Reviews

Craig Stevens is the Co-Author of Brennerâ™s Pharmacology, 4th edition (Saunders, Oct 2012), and has edited Methods for the Discovery and Characterization of G Protein-Coupled Receptors (Springer Protocols, July 2011). Dr. Stevens maintains a second career as an expert witness in Pharmacology and has consulted with lawyers on over 30 cases in both criminal and civil proceedings

Getting me through Pharmacology, so it gets 5 stars. It's concise, and very easy to read.

I've started using this book since the beginning of my second year of medical school and I love it! The chapters are short and the descriptions of the drugs are clear and concise.

Great!!!!!!!!!!!!!!

It was an ok book but too wordy in my opinion. Only rented the text book for the class.

Excellent pharmacology book for nurse practitioner students. Easy to follow and understand.

doesn't work on kindle sometimes

I like the case study scenarios and graphics. The on-line extended resources that can be accessed are also a big plus.

The practice questions are appreciated, but there really needs to be a LOT more of them. You can't adequately assess knowledge of a Pharm chapter with just 5 questions.
