Global Leadership: The Next Generation

Synopsis

The follow-up to Marshall Goldsmith's 500,000-copy bestseller *The Leader of the Future*, *Global Leadership: The Next Generation* systematically identifies what tomorrow's leaders will need to know, do and believe in order to successfully lead the global enterprise of the future. Drawing on the results of an extraordinary 2-year Accenture study of emerging business leaders, this book shows why the skills of today's global leaders won't be enough--and why tomorrow's leaders won't resemble today's. Goldsmith and his co-authors first identify five new "factors of leadership" and their implications: global thinking, appreciation of diversity, technological savvy, a willingness to partner and an openness to sharing leadership. They explain what it will mean to lead in an era where intellectual capital is the dominant source of value; how to lead people whose backgrounds and values may be radically dissimilar from yours; and why achieving personal self-mastery is now a fundamental prerequisite for leading others. From the evolution of "federated," semi-autonomous organizational structures to the personal leadership challenges now arising from globalism, this book offers unprecedented insights into the new challenges of leadership--and what it will take to meet them.

Marshall Goldsmith is one of the world's foremost authorities in helping leaders achieve positive, measurable change. Ranked a Wall Street Journal "Top 10" executive development consultant and profiled by The New Yorker, he is one of an elite few that has worked with over 50 CEOs. He co-founded the Alliance for Strategic Leadership, a leading US provider of customized leadership development, and designed the Leader of the Future Process for developing leaders consistent with an organization's vision and values. He co-edited The Leader of the Future, The Organization of the Future and The Community of the Future; and authored The Many Facets of Leadership (Financial Times Prentice Hall).

Great. Needed for school.

Super redundant, common sense, boring, unnecessary, much below the reading level of a college student. Having this assigned for a class was a waste of time and money. Don't buy this book unless you're working with middle school students.

This is a solid basic text on good leadership practices. Though called "global leadership" it really is common sense leadership, in that it gives a lot of examples as well as exercises to guide through the book and a corresponding course. I believe it is a fitting text for a beginning leadership class in the context of diversity.

Excellent book on Global leadership....

I'd say that is a very general overview of Global Leadership and more than 50% of the book is about general Leadership, concepts that you'd find in any leadership book.

Written well and provides countless examples. No issue with the electronic version; works well. Able to highlight in multiple colors and perform searches for study or reports. Location and highlights maintained across devices.

Very good for my assignments

This is a valuable resource to help you succeed as a futuristic leader!
