# The Art Of Sculpture Welding: From Concept To Creation

## Synopsis

This extraordinary seven-part book covers the processes of creating 13 projects -- from pencils to vases to bicycles -- for all personalities, skill levels and interests. It is specifically designed for students, beginning welders, hobbyists, and do-it-yourselfers. Many of the plans have been built multiple times by students and others. The plans are easy to read and the projects are meant to motivate the reader to want to learn the welding and fabrication processes. All plans include a list of materials, dimensions, special notes as needed., plus any commentaries about special equipment that might be necessary to complete the projects.

Kristi Richardson McCoy is a self-taught welding instructor, with over 16 years of teaching and studying the welding process. Each year she has striven to learn something new about the field, weather it is the certification process, finishes and paints, or trying something new like underwater welding. She earned certification in SMAW and GMAW. Having an art background has helped her develop a creative teaching style that holds the interests of students who might otherwise be intimidated by the welding environment. McCoy teaches Computer-Aided Drafting, Electronics, Woodworking, Basic Welding, Advanced Welding, and Welding Sculpture at Spearfish High School in south Dakota.

Purchased as a gift for my husband, and it was well liked. The projects, and photos are inspiring, and the information provided is arranged nicely.

Another tech ed teacher showed me his copy, so I bought this immediately, knowing what I'd be getting. There are so many projects in here with detailed step-by step instructions and accurate measurements... close-up photos of the work as it proceeds. Whether you are working alone, or facilitating a welding class, get this book!

This is a great book to force a new welder to just get out into the shop and fabricate projects. It can be used as a textbook in a classroom as well. The projects are tailored for the various kinds of welding techniques, arc, MIG, etc, however, all the project may be completed with any technique you chose like only MIG for all the projects.

I bought this for my husband. He loves it and is very inspired to takee his skill to a new level.

great
