Lippincott Q&A Review For NCLEX-RN (Lippincott's Q&A Review For NCLEX-RN (W/CD))

Synopsis

Lippincott Q&A For NCLEX-RN is the leading Q&A book for the NCLEX-RN exam. The new edition contains 6,000 NCLEX questions (more than any other NCLEX book) with answers and rationales for correct and incorrect answers - the perfect tool to help students study and prepare. The questions are of the highest quality--application level and higher. This book contains all of the latest alternate format questions and is the only book updated to the latest NCLEX test plan. Study strategies are included with an emphasis on helping at-risk students. In addition, there is a CD-ROM containing questions that allow students to practice test-taking skills in both a study and review mode, as well as student and instructor resources on the Point. There is the option to package this title with Lippincott's NCLEX-RN 10,000 Powered by PrepU, a powerful adaptive learning system geared to help students prepare for the NCLEX. These 2 products together offer students the perfect practice for the NCLEX-RN exam.

Customer Reviews

As a buyer of this review book, i strongly advise new graduates to purchase this book. A little history about my NCLEx journey... My first try i did not pass nclex. I took kaplan as my review class and to be honest, kaplan did not help me at all. All i got from kaplan was how to answer questions. I did meet kaplan's quota, to achieve scores pass 60 percent but the thing i felt that i lacked in was knowing the content. Went into the exam and boom didnt know one thing. My first attempt at the

nclex and the preparation that followed was doing straight kaplan questions and no reading. Instructors at kaplan advised to keep doing questions, which i did and long stry short i failed the board. I am not bringing kaplan down or anything, i had a great instructor for my review classes but to be honest it just didnt work. I gave myself 1 month break from studying and prepared 6-7months for the next exam. My second attempt, i passed! Now heres my advice and studying strategies i would love to share to you all. first of all i am a note taker, i love taking notes and using highlighters and different colored pens. If you are the same way, use them! I didnt do any of that during my first sit down study sessions before my first attempt. Next! I strongly advise you to purchase this book as well as the saunders book, the Q and A book, the color is blue. With this book, lippincott, it had many challenging questions but it was great challenging questions. I have to say i saw many questions that were similar in lipincott that sort of mirrored nclex questions, not verbatim but rather similar like i had that "oh okay i know where you are going with this question" type of feel. After reviewing this book go to the saunders book and start doing questions from there, the questions in saunder are super easy and it is great to do after having a go with lipincott for awhile. My thing there was that some days i would get a handful of questions wrong from lipincott and it pissed me so much that when i switched over to saunders it made me feel happy because they were easy. It just compensated that pissy feeling that lippincott gave me and saunders just eased them away lol. Lipincott is great because it breaks down sections in nursing for you to review. There is peds and sub sections of peds conditions. Medsurge (respiratory, GI, HTN, etc all in sub sections), altered (schizo, bipolar questions etc) you get the picture. It was very organized to me and help me keep a great system for me to study. Last and final thoughts: my study tips

1. Purchase a big fat notebook with many sections/dividers
2. With each first page of each divider make a heading and label each first page with subjects we studied throughout the course of our nursing school journey. Ie: first page would be about medications. Next page would be medications of HTN etc. NExt, turn to a new divider and label it med surge, and under medsurgel list conditions like electrolytes, blood conditions and take important notes on each sub heading. Do the rest for altered and maternity ect ect. If you have kaplan review book use it as a guide to your note taking. I did that.
3. Purchase alot of highlighters and pens of different kinds. They will help you distinguish your notes and make the flow of reading easier
4. Practice questions! I personally did 60 questions in lipincott and 30 in saunders each day. With lipincott there are many many many questions/pages my advice is to do questions separately in each section. For example do 10 questions on respiration, then 10 questions on maternity hypertension, then ten questions on GI conditions. That way you have variety in the questions you practice.
5. Review what you wrote in your notes. Read over what you wrote! I read

somewhere if you write something and read it later, you will retain it. Very important. BTW i used my kaplan review book as a guide to my note taking so if you have one use it and read everything. Dont just write stuff down and not look at it anymore, you need to read it again, and again , and again.6. Take breaks, go to the gym, play games on your phones. DONT TAKE more than two hours to study, rest your brain. Eat healthy stay active7. rEpeat!! Do this process again, i studied 5 days a week and took sat and sun off8. BELIEVE! When it comes to x number of days till exam day just read your notebook over and over and over, this time that notebook is fillled with information! Also during the final days of your exam lipincott has the luxury for you to do 6 comprehensive exams. DO ALL Of them.You guys can do it. Lipincott is an amazing book, purchase it and you will deffffffffinly pass! My second attempt at nclex, each and every question i knew what they were talking about, with each condition wether it was in the question or the answers i knew what it was. There was nothing in the second exam i did not know. You guys can feel the same way too.

The must have book to pass your NCLEX. I regretted I didn't purchase and don't know about this book. I took my first NCLEX and failed with 265q. For my first NCLEX i did saunders questions.Saunders questions were way to easy not close to actual NCLEX. After that during my preparation to retake my NCLEX. I searched for another NCLEX books and I found this. I read the review from and got a good review so why don't give it a shot. The questions are high level questions which are the questions that you want to practice to keep you in passing level. Love this book. It helped me to think critically which is crucial to success in your NCLEX. The questions are harder than actual NCLEX. When I took my second NCLEX , i felt the questions were easier than this book so I have no problem to answer NCLEX and I passed with 75Q. I also like how the book put the alternate format questions other than multiple choice. Because you have to used to this type of questions. if you don't have time to finish the book just make sure to do all the practice test at the back of the book. Those questions were very helpful for me during my NCLEX. Overall great books much better than saunders. Must have to pass NCLEX. From 265Q to 75Q and passed because of this book.

This is absolutely the best book to study from! I took my NCLEX twice before I bought this book. I got this book and did a few out of each section and did two of the comprehensive tests at the back and passed with minimum questions on the NCLEX. I am a RN now!!! I would absolutely recommend this book to anyone!!! I would put all other books aside and study from this one alone!!!!

This book is simply amazing and SOOOO HARD! But you need to prepare yourself for the hardest questions to be able to pass successfully. I only did the comprehensive exams in the back and that was enough. I felt over prepared after this book, even tho I was only scoring in the 60s. Score doesn't matter, you want to expose yourself to as many questions as possible before diving into the NCLEX. THIS AND Saunders Q&A book (did whole book) had me so ready... I passed with 75q and left smiling.

This book was hands-down the best resource I used to prepare for the NCLEX. Lots of people were getting the Kaplan, but due to the cost and emphasis on strategy, I decided to go a different route and ended up getting the Lippincott instead. The questions are consistently high-quality, and very similar to what you'll see on the actual test. Make sure you study FAITHFULLY from this book (and I mean at least 70-100 questions a night-- start jacking it up to 150-200 near test day), even though your scores will shatter your confidence a little bit, haha. That's what it's designed to do- keep you on your toes and get you used to answering the kinds of questions that will be expected of you--- especially if you are above the passing line! Thousands of questions come with the book, and it can be exhausting sometimes, especially when your scores do not seem to reflect the kind of work that you're putting in (my scores were consistently in the high-60s/low-70s), but it will increase your mental endurance and REALLY prepare you for the test. I just passed the NCLEX on my first try with 75 questions, and I can't think of any resource that was more valuable to me than this book right here.

This book helped me pass my NCLEX! This is a challenging book my opinion but don't be intimidated if you started with a very low score. This helped me to process my knowledge in nursing in a different perspective and it did helped me a lot to improve or be better on answering questions! I passed my NCLEX one take. I highly recommend this book as part of your NCLEX studying materials!

i used this book for about 2 weeks to study for nclex (i took it on june 17 2013). i thought these questions were really good and difficult, making for good practice. the only thing is i didn;t have enough time to use all the tests. overall great resource. comes with a disk too.
