Introduction To Auditory Rehabilitation: A Contemporary Issues Approach (Allyn & Bacon Communication Sciences And Disorders)

Synopsis

Introduction to Auditory Rehabilitation provides students with a solid foundation of essential auditory rehabilitation concepts, knowledge, and skills within the context of critical contemporary issues that successfully prepares future practitioners for service provision to diverse patient populations in the real world. While a case-based approach engages and immerses students in the real world of clinical practice and decision-making, a bevy of pedagogical features including learning objectives, casebook reflections, learning activities, and review exercises to help readers to process and internalize the central issues, tools, and philosophies of the field. The first section of the textbook provides a contemporary context for learning including an introduction to auditory rehabilitation, the psychosocial aspects of hearing impairment, and discussions of professional and multicultural issues. A full chapter is devoted to evidence-based practice and provides tools for use in clinical decision-making. The second section focuses on technology with informative chapters on hearing aids, cochlear implants, and assistive hearing technology. The final section covers the effects of and treatments for hearing impairment across the lifespan using process-driven, patient- and family-centered philosophies.

Introduction to Auditory Rehabilitation provides students with a solid foundation of essential auditory

rehabilitation concepts, knowledge, and skills within the context of critical contemporary issues that successfully prepares future practitioners for service provision to diverse patient populations in the real world. While a rubber hits the road approach engages and immerses students in the real world of clinical practice and decision-making, a bevy of pedagogical features including learning objectives, casebook reflections, learning activities, and review exercises to help readers to process and internalize the central issues, tools, and philosophies of the field. The first section of the textbook provides a contemporary context for learning including an introduction to auditory rehabilitation, the psychosocial aspects of hearing impairment, and discussions of professional and multicultural issues. A full chapter is devoted to evidence-based practice and provides tools for use in clinical decision-making. The second section focuses on technology with informative chapters on hearing aids, cochlear implants, and assistive hearing technology. The final section covers the effects of and treatments for hearing impairment across the lifespan using process-driven, patient- and family-centered philosophies.

Carole E. Johnson is a professor in the Department of Communication Disorders at Auburn University and runs the Auburn University Auditory Rehabilitation Laboratory. She received her Ph.D. from the University of Tennessee at Knoxville and her Au.D. from the Pennsylvania College of Optometry, School of Audiology. Aside from publishing a number of articles and book chapters, she has co-authored two books, Guidebook for Support Programs in Aural Rehabilitation (Singular, 1999) and Handbook of Outcomes Measurement in Audiology (Singular, 2002). In addition, she was recipient of the Larry Mauldin Award for Excellence in Education in 2007.

Fantastic condition of the book and exactly what I needed!

Perfect, super fast shipment

This is my textbook for an Audiology class and its exactly what I needed.

Thank you

Comprehensive and interesting! Thrilled to have it on Kindle. A fabulous alternative to adding more bulk to my textbook load.
