Not laid out in a manner I prefer but all the content is great and I know enough to use what I need. jazz is not really for beginners anyway so yeah its a good book if you can already play.

I bought in the kindle version, i can't see some pages because the images are too small. Also i

didn't receive the audio. I recommend to buy the paper version, not the kindle one.

Excellent book. Many good jazz chord progressions. Lots of jazzy licks in tablature. Has some really good jazz standards. The CD is very helpful. I would say that this book is good for intermediate and experienced players.

This is a great book for learning the basics of how to play jazz guitar. While it's not necessarily for a beginner guitarist, it's still a good book for learning jazz.

This book is information dense and it's going to take a bit of time to soak it all in. All in all, it's great book covering alot of ground.

Very good! What I needed.

Help!!! Can't find the mp3 files for this book for kindle version ;(using PC windows

Bought this for my son (been taking lessons for a couple of years) and he loves it!
