The Battleship Tirpitz (Super Drawings In 3D)

Synopsis

The Tirpitz, sister ship of the legendary Bismarck, was the last battleship to be procured by the German Kriegsmarine. As fate would have it, she spent almost the entire war in Norway and although she never got a chance to use her guns against enemy warships, her existence alone was a major threat to Allied shipping. Being a "fleet in being" in the fjords of Norway, Tirpitz tied up huge Allied resources to keep her in check. It is no wonder then that the Allies attempted to take her out of action at all costs and subjected Tirpitz to countless air and surface attacks throughout her service career.

Book Information

Series: Super Drawings in 3D (Book 16038)

Hardcover: 100 pages

Publisher: Kagero (April 3, 2017)

Customer Reviews

Nice book to go with my warship collection

This book is the 38th entry in Kagero's generally outstanding Superdrawings in 3D series (it is #16038). It is a stapled, 8-1/4" x 11-3/4" card cover with 96 interior pages. Like the others in this series the card covers count in the page numbering. Also like others in the series there is a brief 6 page text which covers the origins and service history briefly, but competently, and a table of technical characteristics. The meat of the book are the computer renderings of the ship in all its glory. They are superbly done and the published views seem particularly well chosen. Often when reading a book in this series I wish that the captions could have been more informative but in this book they seemed comprehensive and I learned a lot from them. The translation in this book

seemed particularly good; in the past it was generally adequate to serviceable. The one area I could have wished for more coverage was the athwartships catapult. It was always depicted as mostly obscured by removable deckplates. In the text and captions it is described as two catapults, port and starboard, but I think it is more accurately a double acting catapult. Included with the book is an unbound foldout with more computer renderings. Outstanding here is a comparison between Tirpitz and its sister ship, Bismarck. If buying second hand make sure it is included. Highly recommended. The newest Kagero books are impossible to get from US distributors including these days. If you want a copy you'll have to look at foreign sources. I don't know the reason for this; if you know please enlighten me.
