REINVENTING the ECONOMY
to END OPPRESSION

PETER
JOSEPH

founder of THE ZEITGEIST MOVEMENT
READ BY THE AUTHOR • UNABRIDGED

Synopsis

Society is broken. We can design our way to a better one. In our interconnected world, self-interest and social interest are rapidly becoming indistinguishable. If current negative trajectories remain, including growing climate destabilization, biodiversity loss, and economic inequality, an impending future of ecological collapse and societal destabilization will make "personal success" virtually meaningless. Yet our broken social system incentivizes behavior that will only make our problems worse. If true human rights progress is to be achieved today, it is time we dig deeper - rethinking the very foundation of our social system. In this engaging, important work, Peter Joseph, founder of the world's largest grassroots social movement - the Zeitgeist Movement - draws from economics, history, philosophy, and modern public-health research to present a bold case for rethinking activism in the 21st century. Arguing against the long-standing narrative of universal scarcity and other pervasive myths that defend the current state of affairs, *The New Human Rights Movement* illuminates the structural causes of poverty, social oppression, and the ongoing degradation of public health, and it ultimately presents the case for an updated economic approach. Joseph explores the potential of this grand shift and how we can design our way to a world where the human family has become truly sustainable. *The New Human Rights Movement* reveals the critical importance of a unified activism working to overcome the inherent injustice of our system. This book warns against what is in store if we continue to ignore the flaws of our socioeconomic approach, while also revealing the bright and expansive future possible if we succeed. Will you join the movement?

ASIN: B07363DF2D

Best Sellers Rank: #13 in Books > Law > Constitutional Law > Human Rights #23 in Books > Politics & Social Sciences > Philosophy > Social Philosophy #33 in Books > Audible Audiobooks

Customer Reviews

Peter Joseph's work is the most honest, inspirational, liberating, and compassionate media I have come across. I consider myself a business professional, one-time theist, and a veteran of corporate politics. His work not only identifies the problems of these modern systems that leave so many of us behind, but it also instills a sense of urgency while also instilling a sense of peace, inspiring oneself to serve a much grander purpose than just self placation. His work transcends ruling political and economic ideologies while providing realistic and inspirational solutions for everyone. I don't say this lightly as I am skeptical of anything and everything, but Peter's work holds ground under the scrutiny of social science and methodology. He has become a hero of mine in many many ways. Nice work and thank you, Peter. North America

This is perhaps the most important book of our times. It is said that you cannot learn truth through the lens of a lie, this book provides the lens necessary to understand every major global issue we face as human beings and as a society. At a time when false symbolism is all and we are witnessing the implosion of truth, this book scientifically and methodologically cuts through the formaldehyde of identity politics, capitalism-spawned abominations, concealed class warfare, structural violence, systematic poverty, ceaseless misinformation, and droves of opinion-pissing human clickbaiters by giving the reader a deep understanding of causality and backing those conclusions with empirical evidence. It is both a treasure-trove of information and more importantly, an action plan to end the deathscape of endemic poverty, unsustainable wealth inequality, and environmental destruction. Not only should the public be aware of the information provided in this book, but it should be required reading and placed on the desks of every major global institution, governing bodies, educational institutions, think tanks, and so on. It is our only chance at moving towards a survivable future. Eternally thankful for this book and your relentless dedication to human progress, Peter Joseph.

Peter Joseph is able to articulate the issues that society faces today in a way that few others are able to. He brings to light many human rights abuses that we face and often unwittingly support on an ongoing global scale, but beyond bringing them to light, he sheds some glimmer of hope how they can be ameliorated by a paradigm shift in our values and old ways of thinking. With the inclusion of rigorous research and detail, Peter has put into words what many activists, idealists,

and even ordinary citizens have been thinking for a long time, and that's how to truly address the most fundamental problems that the world faces today, not just on the superficial level that usual politics tosses about, but really getting at the root in order to make a significant constructive change for all humans.

Peter Joseph's analysis of the problems facing our current socio-economic system is detailed, insightful, and profound. If you haven't been introduced to his work before, this is an excellent place to start. Unless you are harboring some form of extreme ideological baggage the contents of this book will forever revolutionize the way you perceive society and the world economy as a whole. The sheer amount of research included is incredible, and the references are thoroughly sourced. The book is also very skillfully written. It gracefully guides you along, providing historical and modern examples to carefully illustrate its primary message, and remains compelling throughout. I personally gained plenty of new knowledge and understanding from this book, and I've been following Peter's work in activism for years. If you are interested in pinpointing the roots of the societal problems facing our world today, then you owe it to yourself to CHECK THIS OUT! If reading isn't your thing, try the audio book instead. It's easy to listen to and great for long car rides or satisfying your brain when doing busy work. It's even read by Peter himself.

This is one of the most important books of our time by far. I sincerely hope that at some point in the near future this book is provided as an audio version and that copies are provided free of charge to as many people as possible. This book should be required reading for all school age children. This book should be translated into all languages and disseminated as far and wide as possible. The way that Peter breaks down our global situations and overarching societal issues into structural and technical problems and then provides technical solutions is truly one of the most important re-frames in modern history. We have the opportunity to completely rehaul our entire society into a more fair, just, sustainable and humane situation for everyone, and Peter is truly on the forefront of this new realization of our potential. I will be recommending this book for years to come to all of the activists that I meet.
