# Dinosaurs: 101 Super Fun Facts And Amazing Pictures (Featuring The World's Top 16 Dinosaurs)

## Synopsis

**DINOSAURS: 101 SUPER FUN FACTS AND AMAZING PICTURES ( FEATURING THE WORLD'S TOP 16 DINOSAURS)** This book depicts the wonder of the world of Dinosaurs in all its glory.

Children are given a well-rounded understanding of this fascinating creature: its anatomy, feeding habits and behavior. The following dinosaurs and pre-historic creatures are featured: Allosaurus Brachiosaurus Deinonychus Diplodocus Elasmosaurus Kentrosaurus Peteinosaurus Plateosaurus Pteranodon Stegosaurus Tylosaurus Tyrannosaurus Triceratops Velociraptor Spinosaurus Archaeopteryx The description in the large text is simple enough for early readers or for a parent to guide a child through. There is also a picture caption, which provides more information to talk about with your child. Alternatively, a child of any age (even the child in you) can just look at the images and appreciate its beauty. Do enjoy!

## Customer Reviews

This ebook is offered for free right now so at that price it's a 4 star review. I do like this book but I will say it's not my favorite 101 Super Fun Facts book that Janet Evans wrote. One part in the book

talks about the Elasmosaurus dinosaur and how its' neck is 25 feet long. It states that it would "take 4 giraffes to match the length of these dinosaurs' necks." Well, I took that to mean that the neck would be as tall as 4 giraffes but what they meant was giraffes necks. Also, another Fun Fact is that "the Pterosaur lived to fly." A fun fact? That's like saying a robin lived to fly. This is just something I find strange to say. Does it take away from the 101 facts? Well, not really because many of the "facts" are actually several sentences with several facts rolled into a mini paragraph. I find the numbering of the facts strange in this book. In the few other book I've read in this series, the facts are numbers to 101 and not just random numbers within each chapter. For example, one chapter has the fun facts listed 1-6 then starts over again after one of the pictures and lists the next facts as 1 and 2. Most of the chapters just start over at 1. The book is broken down into 16 chapters with an introduction. Each the 16 chapters is a different dinosaur. Each dinosaur has several facts listed about it. There are some cool drawings of dinosaurs but not as many as the kids and I would like. As others have said, I think this Fun Facts book is for older children. It's not a picture book for little kids. It's perfect for my 4th grader and I really enjoyed reading the fun facts as well. So all in all a good ebook for free!! Check out other 101 Fun Fact books by Janet Evans. Seems many of them are offered for free and these are great ebook to keep on your device for kids of all ages\*\*\*\*\* I received this book for free in exchange for my honest review. \*\*\*\*\*

My great nephew and I love to read together. He is five and absolutely adores learning books and quoting facts, already! I figured this series of "101 Super Fun Facts and Amazing Pictures" books would be an excellent choice for us to enjoy together. I ordered the eBooks on each of these subjects: Snakes, Penguins, Sea Turtles, Spiders, Dolphins, and Dinosaurs. He loved each of these books. I thought we would just sit down and read all of these books, all in a row, but these are substantial books, so we did two per sitting/day and this worked out well for his age. Despite them being long books with a lot of information for a 5-year-old, he enjoyed them each and they held his interest the whole time, even with a bit of fidgetiness toward the end. He loved choosing the order we read them in and enjoyed each of the subjects equally as much as the others. These books could be written just for him and his interests. There is a lot of information in them and we both learned a lot. I can definitely see us revisiting each of these books over and over in the future, soaking up a little more of that info each time, which is excellent. I have a feeling he will be quoting the facts he learned in these books to his sisters and parents quite a bit. I received these eBooks free in exchange for writing an honest and unbiased review. Again, these are each great books, full of fun and interesting information. We would both recommend them for 5-year-olds

and above, in general, depending on the child's interest level. I take writing product reviews very seriously, as I rely heavily on reviews of others when considering purchases. I hope this review has been helpful to you.

My second to oldest son is fixing to be 8 and has had a love for dinosaurs even since he could recognize them. He has virtually every dinosaur toy, and picks up every dinosaur book he sees. So when I come across one he currently doesn't have I get it. So when I downloaded this one I knew it would be a hit around here. He opened it up almost immediately of course and enjoyed the whole thing. The pictures are a bit cartoonish, which he mentioned. However they are not horrible and they do a decent job portraying the dinosaur. The facts are most of which he already knew, but he still enjoyed the book very much. I'm glad I found it and I know he'll read it for a while to come. Its a nice addition to our kindle library.

It had a lot of great pictures that children will really enjoy. The texts, however, are quite a problem. An adult reading to a child can change the awkward sentence structure, but for kids who read it themselves, it can get pretty confusing. One thing, too, is when giving the descriptions of the dinosaurs, they keep using the present tense. This dinosaur IS 49 feet long, as if they are still roaming around! That would be enough to make me nervous, if I were a kid! If Janet Evans needs a proofreader for her books, I'd be more than happy to do it!

This book loaded quickly and easily. I had a number of different age groups look at the book and give me their feedback. It is written for an older audience but the younger children enjoyed the pictures. The illustrations are artist renditions of the dinosaurs as they would have looked while they roamed the earth. It is very well done and the facts are concise and to the point. The author talks about what the dinosaurs ate. Who they might have eaten and who might eat them in return. Comparisons were given about what other dinosaurs they may have looked like. I like that the author listed where the fossils had been found because it gives you an idea of where they lived while they were alive. The author also lists the period in which they lived. (Jurassic, Cretaceous, etc.) This is a good little resource for some quick facts on a number dinosaurs that roamed the earth. I liked the fact that the author gave the range that the dinosaurs were found in when it covered a large area. An example is the Tyrannosaurus Rex was found in Asia as well as North America. I think that sometimes we get the idea that dinosaurs stayed in one place and this books help children understand that many of the hunters roamed in large areas. The water dinosaurs were

more localized and that different dinosaurs lived in different places at different times. Overall a great little book.
