Bones, Bones, Dinosaur Bones

Synopsis

Six paleontologists search for bones. When they find them, they dig them up, wrap them, and load them on a truck, bound for the museum. With simple text and vibrant illustrations, young readers explore the process of finding and assembling bone fossils. Bones. Bones. We look for bones. We look for the bones of dinosaurs. Supports the Common Core State Standards.

Book Information

Age Range: 4 - 8 years

Lexile Measure: 290L (What's this?)

Hardcover: 32 pages

Publisher: Greenwillow Books (September 30, 1990)

Language: English

ISBN-10: 0690048254

ISBN-13: 978-0690048254

Product Dimensions: 10 x 0.3 x 8.8 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.8 out of 5 stars 22 customer reviews

Best Sellers Rank: #124,178 in Books (See Top 100 in Books) #60 in [Books > Children's Books > Education & Reference > History > Exploration & Discovery](#) #176 in [Books > Children's Books > Education & Reference > Science Studies > Zoology](#) #245 in [Books > Children's Books > Animals > Dinosaurs](#)

Customer Reviews

Once again, the author of *Dinosaurs, Dinosaurs*; *Trucks*; *Boats* and other picture books proves himself a master of simplicity. Here, a spare, rhythmic text ("Bones. Bones. We look for bones.") and vibrant, childlike pictures focus on six young paleontologists at work. They diligently dig up the dinosaur bones, wrap and pack them, load them on trucks and bring them to the natural history museum. There the bones are dusted off, and the skeleton of a *Tyrannosaurus rex* is reassembled, bone by bone. Finally, the painstaking job is completed, and the six workers set out in search of more bones. Barton makes a complex procedure easily comprehensible to the very youngest readers--and listeners. Children who have looked at dinosaur skeletons in museums and asked "How did it get here?" now have a concise, entertaining answer. Ages 3-6. Copyright 1990 Reed Business Information, Inc.

As in *I Want to Be an Astronaut* (Crowell, 1988), Barton takes a complex profession and makes it comprehensible to the very young. This time he captures the essence of the paleontologist's work: "Bones. Bones. We look for bones," and "We look for the bones of dinosaurs." Six stoic scientists of both genders and varied race are depicted digging, wrapping, packing, loading, and assembling their finds. The illustrations are painted in bold primary colors on green, blue, and yellow backdrops; don't let children miss out on the last spread, in which nine dinosaurs are found, with labels that include pronunciations. A fine companion volume to Barton's *Dinosaurs*, *Dinosaurs* (Crowell, 1989).

good information

too cute

Excellent book for young children exploring dinosaurs. It is well illustrated and the text is appropriate for kindergarten children.

Byron Barton's "Bones, Bones..." has the simple, inevitable story line that my son loves, plus the building up of the dinosaur image from the bones found in an archeological expedition. For any dinosaur kid who is at the developmental stage of building up from the pieces - seeing the bones uncovered, packed, transported and unpacked before assembly into a dino skeleton (T Rex, of course) is a daily delight. It is a simple story, though, so choose for younger readers.

Dinosaur week was over when this book finally came in but I read through it and I believe the children will really enjoy it so I am going to save it for Dinosaur week next year.

great for preschool

Fast delivery, exactly what we wanted!

This is my 2 1/2 year old granddaughters favorite book! It's not lengthy but it is a good read and she loves naming the dinos on the page they show all the different ones of
