Aircraft Materials And Analysis (Aviation)

Synopsis

Complete coverage of aircraft design, manufacturing, and maintenance Aircraft Materials and Analysis addresses aircraft design, mechanical and structural factors in aviation, flight loads, structural integrity, stresses, properties of materials, compression, bending, and aircraft fatigue. Detailed analysis of the failure process is provided. This authoritative guide examines materials used in aircraft construction such as aluminum, steel, glass, composite, rubber, and carbon fiber. Maintenance procedures for corrosion and aging aircraft are discussed and methods of inspection such as nondestructive testing and nondestructive inspection are described. Accident investigation case studies review aircraft design, material behavior, NTSB findings, safety, stress factors, and human factor involvement. End-of-chapter questions reinforce the topics covered in this practical resource. Aircraft Materials and Analysis covers: The aircraft--standards for design, structural integrity, and system safety Aircraft materials Loads on the aircraft Stress analysis Torsion, compression, and bending loads Aircraft riveted joints and pressure vessels Heat treatments of metals Aircraft fatigue/aircraft material fatigue Aircraft corrosion Dynamic stress, temperature stress, and experimental methods Composites Nondestructive Testing (NDT) Aviation maintenance management Case studies and human factors

Book Information

Series: Aviation

Paperback: 288 pages

Publisher: McGraw-Hill Education; 1 edition (September 23, 2014)

Language: English

ISBN-10: 0071831134

ISBN-13: 978-0071831130

Product Dimensions: 7.4 x 0.6 x 9.2 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #723,913 in Books (See Top 100 in Books) #121 in Books > Engineering & Transportation > Engineering > Aerospace > Aircraft Design & Construction #405 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Structural #777 in Books > Engineering & Transportation > Engineering > Materials & Material Science > Materials Science

Customer Reviews

Tariq Siddiqui is a manager of aircraft maintenance at a commercial airline and a professor at

Embry Riddle Aeronautical University. He has more than 20 years of experience in aviation maintenance, management, project management, environmental regulations, and incident and accident investigation.

A highly technical yet readable edition to my library.
